

DIY Glitter Jar

1. Fill your jar about $\frac{1}{2}$ way with warm water.
2. Squeeze about $\frac{1}{4}$ bottle of **clear** glue into the water in your jar.
3. Stir the water and glue quickly and carefully until everything in the jar is one consistency.
4. Add glitter to the jar. You'll want to add a bunch. Adding glitter of different sizes or colors can add dimension to your jar.
5. Add **1** drop of food coloring.
6. Stir the food coloring and glitter into the water. Check the distribution of water and glitter: if it doesn't seem like there is enough glitter, this is a good time to add some more.
7. Slowly add water to the jar until it is completely full.
8. Put the cap on very tightly. If you aren't sure, ask your neighbor to check.
9. Give your Glitter Jar a shake over a bowl, or sink to ensure it won't leak. If it doesn't leak...
10. Enjoy your Glitter Jar.

You can decorate the cap with paint, markers, etc. either before or after constructing the jar. Just be sure the cap is dry and smear-proof prior to making the jar.
