

## Cardstock Fidget Spinners!

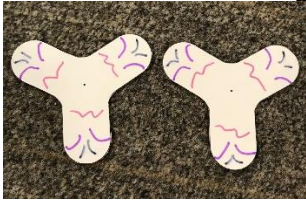

Supplies: 2 cardstock templates, 3 washers, 1 paperclip, hot glue gun and glue, push pin, bamboo skewer, masking tape, markers.

### Procedure:

1. Cut out the fidget spinner shape from two cardstock templates.

2. Create and color a design on one side of each fidget spinner shape.

3. Take one fidget spinner shape and, with a librarian's help, carefully hot glue a washer to each of the three arms of the fidget spinner shape on the undecorated side.

4. With a librarian's help, use hot glue to carefully attach the second fidget spinner shape design side up to the top of the first fidget spinner shape with the washers attached. The washers should be sandwiched between the two shapes.

5. With a librarian's help, use a pushpin and a bamboo spinner to create a hole in the center of sandwiched fidget spinner shapes.

6. Guide a paper clip through the hole created in the fidget spinner shapes.

7. Bend the ends of the paperclip over, creating a U shape at each end.

8. Wrap each end of the paper clip in masking tape.

9. Hold the ends of the paper clip between two fingers and give the fidget spinner shape a spin. You have now created a cardstock fidget spinner!
